DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Harada et al (US 6,251,774)

forming an insulating layer 32 on a bottom wiring 30 (col 5, lines 17-22)

forming via holes 46 exposing a part of the bottom wiring by removing the insulating layer selectively (fig. 1F)

filling insides of the via holes to a prescribed thickness using non-conductive material 48 (col 6, lines 19-21; fig. 1D)

forming an anti-reflective layer 50 on the via holes and the insulating layer (col 6, lines 30-31; fig. 1D)

forming a mask pattern for trench etching in the insulating layer on which the anti-reflection layer is formed (col 6, lines 29-30)

forming a damascene pattern after forming trenches using the mask pattern (fig. 1F)

Regarding claim 2, Harada discloses forming a non-conductive material layer on the insulating layer in which the via holes are formed and removing the non-conductive material layer selectively to make the insulating layer become exposed and to make the non-conductive material remain for a prescribed thickness (fig. 4C)

Art Unit: 1765

Regarding claim 3, Harada discloses the non-conductive material layer is made of photoresist (col 6, lines 20-21)

Regarding claim 4, Harada discloses selective removal utilizes entire surface dry etching process (col 6, lines 44-46)
